MW EVA 23S THE TACTICAL EVACUATION STRETCHER

The carrying bag's small size of 42 x 15 x 9 cm and the attachment with velcro enable even tight attachment places.

DESCRIPTION:

The tactical evacuation kit is a quick, easy to assemble light weight piece of equipment that allows a combatant to rapidly transport an injured person. The device is constructed out of extremely durable carbon fiber and fitted into a carrying bag that can be attached to any vehicle and the combatant's load bearing equipment.

SMALLEST AND LIGHTEST

The small size and light weight of the product make it suitable for use in particularly demanding environments where carrying capacity, muscle strength and reaction time can be the difference between a life lost or a life saved.

Straps quick-attach connectors

FASTEST

The device is a rapidly assembled light CASEVAC tool that fits into small spaces. The tool is suitable for use by special forces, rescue and fire departments and different crisis management or peace-keeping forces.
